Professional Summary

Detail-oriented Computer Science undergraduate specializing in Cyber Security, with strong foundations in secure software development, web technologies, and cloud platforms. Hands-on experience in building and monitoring applications using Python, with practical knowledge of networking, system security, vulnerability awareness, and log-based threat analysis. Proven ability to apply cybersecurity principles, automation, and analytical thinking to develop reliable and secure technology solutions.

Education:

- Vignan's Institute of Engineering for Women, Visakhapatnam** 2023 – 2027
B Tech in Computer Science and Engineering (Cyber Security) | CGPA: 8.36 (Till 3-1)
- Sri Chaitanya Junior College, Visakhapatnam** 2021 – 2023
Intermediate Education (MPC) | 80%
- SR Digi School, Visakhapatnam**
CBSE (Central Board of Secondary Education)

Skills

Languages: C, Java, Python, HTML, CSS, SQL

Technologies & Tools:

- Operating Systems: Windows, Linux
- Cloud Platforms: Google Cloud Platform
- Databases: MySQL
- Core Computer Science: OOPS, DBMS, Computer Networks, OS
- Development Tools: Git/GitHub, VS Code, Jenkins, Kubernetes
- Virtualization & Containerization: Docker, VirtualBox

Project Work

Alert Wise – Natural Calamity Alert System

- Developed a location-based alert system that detects and notifies users about natural disasters in real time.
- Implemented frontend using HTML, CSS, and JavaScript with integration of geolocation APIs.
- Improved community safety by ensuring faster access to alerts and reducing response delays

Clean Map – Clean Water and Sanitation Platform

- Built a web application that allows users to report water and sanitation issues on an interactive Google Map.
- Engineered the platform using HTML, CSS, JavaScript, and Google Maps API for real-time issue mapping.
- Supported community hygiene and awareness by providing a tool for public reporting and monitoring.

MU Showdown Watch Project

- Created a real-time monitoring system to track and compare showdown events through a live dashboard.
- Integrated Python, HTML, CSS, JavaScript, and APIs for data processing and interactive visualization.
- Enhanced analytical decision-making by providing instant performance comparisons and insights.

Vulnerability Assessment and Exploit Simulation (VA & ES)

- Developed a cybersecurity simulation project to identify and analyse system vulnerabilities in a controlled environment.

- Demonstrated exploit scenarios to understand real-world attack techniques and security risks.
- Enhanced practical knowledge in penetration testing concepts, threat detection, and mitigation strategies.

Login–Signup DevOps: CI/CD Enabled Web Application

- Developed a Login–Signup web application integrated with a CI/CD pipeline for automated build and deployment.
- Implemented DevOps workflow using Git, Jenkins, and Docker to enable continuous integration and seamless delivery.
- Containerized the application and automated deployment processes to improve scalability, reliability, and operational efficiency.

Internships:

Internshala Trainings – Web Development Intern

Jun 2024 – Jul 2024

- Designed responsive web pages using HTML, CSS, and JavaScript.
- Built backend features with Node.js and MongoDB for dynamic functionality.
- Improved problem-solving by applying real-world use cases in projects.

Data Valley – Flutter Development Intern

Jun 2024 – Aug 2024

- Developed cross-platform mobile applications using Flutter and Dart.
- Implemented responsive UI components and integrated APIs for dynamic data handling.
- Collaborated with mentors to debug, test, and optimize app performance.
- Gained hands-on experience in mobile app development lifecycle, from design to deployment.

Awards and Certificates

- Successfully completed **Python for Data Science** certification through NPTEL, strengthening programming and analytical skills.
- Earned certification in **Internet Crimes and Cyber Security**, gaining knowledge of cyber threats, attacks, and prevention methods.
- Completed **Cyber Security Fundamentals** training, covering network security, encryption, and vulnerability concepts.
- Achieved certifications in **AI and Emerging Technologies**, exploring real-world applications in intelligent systems.
- Participated in multiple online learning programs focused on ethical hacking, penetration testing, and secure development.

Awards and Certificates:

- Python for Data Science (NPTEL): Strengthened programming and analytical skills.
 - Internet Crimes and Cyber Security: Gained knowledge of cyber threats, attacks, and prevention methods.
 - Cyber Security Fundamentals: Covered network security, encryption, and vulnerability concepts.
 - AI and Emerging Technologies: Explored real-world applications in intelligent systems.
 - Ethical Hacking & Penetration Testing: Participated in online programs focused on secure development
